

BSC's Breakfast Club Series

Tasty Technologies!

What are the latest trends in your kitchen?

How about the TMIO oven! It refrigerates your food, then cooks it. You can operate it from work or the soccer field. All you want is an oven... well it convects too. Perfectly. **Winner of more awards than any other oven. Ever!**

How about induction cooking? Twice the speed of gas, and 1/3 less energy usage. We'll be cooking on the Viking induction cooktop. You can too.

These are just two examples of what your new dream kitchen can be made of.

Join us as we explore new cooking possibilities and unveil tomorrow's kitchen... today!

What: Tasty Technology: Tomorrow's technologies for your kitchen...Today.
